Introduction

This document describes the functionality and key specifications of the Quartz 12 Megapixel series. The Q-12A65 is a 12 Megapixel camera equipped with a pipe-lined global shutter CMOS sensor and embedded in a robust housing. The 4096x3072 active pixels provide a 4:3 image format with 5.5 μm square pixels. Pipe-lined global shutter technology assures low read noise combined with accurate shutter performance. All Quartz cameras are fitted with Adimec True Accurate Imaging® technology. This is a combined set of image enhancement technologies enabling the best imaging performance for inspections and metrology applications.

Functionality

Acquisition

Image Acquisition	Continuous or externally controlled (triggered). Image acquisition timing is fully separated from the output interface by means of a real-time FIFO buffer. This supports burst mode acquisition
Gain	Digital Fine Gain selectable between 1x and 8x in steps of 0.01

12 Mpx resolution

Memory	FIFO buffer of 17 full size images
Intergration time control (continuous mode)	Programmable between 68 μ s and 100 ms in units of 1 μ s

Processing

Digital Binning	2x, 4x (N.A. in color version)
Defect Pixel Correction	Advanced defect correction, 500 defect correction map capacity
Flat Field Correction	Offset and gain correction per pixel 4 (mono), 3 (color) sets user programmable
HiQ mode	Averages multiple images (max. 8) in-camera and outputs a single image at full or ROI resolution. Shot noise improvement up to 9 dB (see figure 3)
HDR mode	Sensor multi-slope (knee) function enhancing scene Dynamic Range up to 90 dB (non-linear)
ROI	Fully programmable ROI in horizontal and vertical direction Max frame speed increases when ROI is reduced in vertical direction (see figure 4)
Mirroring	Selectable horizontal and vertical mirror
Video compression	10-bit output LUT, fully user programmable

Service & Miscellaneous

Test mode	Internal test pattern generator available for checking the complete digital image chain
User storage	Availability of storage for 16 signed integers and 16 strings of 32 characters
Image tagging	Attaches digital information to output image
Camera ID	Camera type, build state and serial number can be queried via software
