Fundamental Aurora Design Assistant Technical Enablement

2-day Agenda[**]

Day 1

Exercise 1
Introduction to Aurora Design Assistant

Exercise 2
Inspecting/validating an object that appears anywhere in the image

Exercise 3
Reading text using DL-OCR

Exercise 4
Classifying bottle lids using Deep Learning

Exercise 5
Measuring the heights of objects using 3D – part 1

Day 2

Exercise 6
Generating a chart in an operator view using expressions

Exercise 7
Validating the perpendicularity of two pieces of an object using Metrology

Exercise 8
Introduction to connecting a USB3 Vision camera and calibration

Exercise 9
Measuring the heights of objects using 3D – part 2
includes variables and more expressions
